

ASME NQA-1-2024
(Revision of ASME NQA-1-2022)

Quality Assurance Requirements for Nuclear Facility Applications

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME NQA-1-2024
(Revision of ASME NQA-1-2022)

Quality Assurance Requirements for Nuclear Facility Applications

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: July 24, 2024

The next edition of this Standard is scheduled for publication in 2026.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "certify," "rate," or "endorse" any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

Foreword	xviii	
Correspondence With the NQA Committee	xxiv	
Committee Roster	xx	
Introduction	xxv	
Summary of Changes	xxvi	
Part I		
	Requirements for Quality Assurance Programs for Nuclear Facilities (From Former ASME NQA-1)	1
	Introduction	1
100	Purpose	1
200	Applicability	1
300	Responsibility	1
400	Terms and Definitions	1
Requirement 1	Organization	5
100	General	5
200	Structure and Responsibility	5
300	Interface Control	5
Requirement 2	Quality Assurance Program	6
100	General	6
200	Indoctrination and Training	6
300	Qualification Requirements	6
400	Records of Qualification	8
500	Records	8
Requirement 3	Design Control	9
100	General	9
200	Design Input	9
300	Design Process	9
400	Design Analyses	9
500	Design Verification	10
600	Change Control	10
700	Interface Control	11
800	Software Design Control	11
900	Documentation and Records	11
Requirement 4	Procurement Document Control	12
100	General	12
200	Content of the Procurement Documents	12
300	Procurement Document Review	12
400	Procurement Document Changes	12
Requirement 5	Instructions, Procedures, and Drawings	13

100	General	13
Requirement 6	Document Control	14
100	General	14
200	Document Control	14
300	Document Changes	14
Requirement 7	Control of Purchased Items and Services	15
100	General	15
200	Supplier Evaluation and Selection	15
300	Bid Evaluation	15
400	Control of Supplier-Generated Documents	15
500	Acceptance of Item or Service	15
600	Control of Supplier Nonconformances	16
700	Commercial Grade Items and Services	16
800	Records	17
Requirement 8	Identification and Control of Items	18
100	General	18
200	Identification Methods	18
300	Specific Requirements	18
Requirement 9	Control of Special Processes	19
100	General	19
200	Process Control	19
300	Records	19
Requirement 10	Inspection	20
100	General	20
200	Inspection Requirements	20
300	Inspection Hold Points	20
400	Inspection Planning	20
500	In-Process Inspection	20
600	Final Inspections	20
700	Inspections During Operations	20
800	Records	20
Requirement 11	Test Control	22
100	General	22
200	Test Requirements	22
300	Test Procedures	22
400	Test Results	22
500	Test Records	22
Requirement 12	Control of Measuring and Test Equipment	23
100	General	23
200	Selection	23
300	Calibration and Control	23
400	Records	23
Requirement 13	Handling, Storage, and Shipping	25
100	General	25
200	Special Requirements	25

300	Procedures	25
400	Tools and Equipment	25
500	Operators	25
600	Marking or Labeling	25
Requirement 14	Inspection, Test, and Operating Status	26
100	General	26
200	Authority	26
300	Status Indication	26
Requirement 15	Control of Nonconforming Items	27
100	General	27
200	Identification	27
300	Segregation	27
400	Disposition	27
Requirement 16	Corrective Action	28
100	General	28
Requirement 17	Quality Assurance Records	29
100	General	29
200	Generation of Records	29
300	Authentication of Records	29
400	Classification	29
500	Receipt Control of Records	29
600	Storage	29
700	Retention	30
800	Maintenance of Records	30
Requirement 18	Audits	31
100	General	31
200	Scheduling	31
300	Preparation	31
400	Performance	32
500	Reporting	32
600	Response	32
700	Follow-Up Action	32
800	Records	32
Part II	Quality Assurance Requirements for Nuclear Facility Applications	33
	Introduction	33
100	Purpose	33
200	Applicability	33
300	Responsibility	33
400	Planning and Procedures	33
500	Definitions	34
600	Multiunit Facility Provisions	34
Subpart 2.1	Quality Assurance Requirements for Cleaning and Cleanliness	
	Control of Fluid Systems and Associated Components for Nuclear Facilities	35
100	General	35
200	General Requirements	36

300	Cleanliness Criteria	37
400	Manufacturing Phase Cleanliness	40
500	Cleanliness Prior to Installation	41
600	Cleanliness During Installation	41
700	Maintenance of Installation Cleanliness	42
800	Preoperational Cleaning	42
900	Layup and Postlayup Cleaning	43
1000	Postoperational Repairs and Modifications	43
1100	Records	43
Subpart 2.2	Quality Assurance Requirements for Packaging, Shipping, Receiving, Storage, and Handling of Items for Nuclear Facilities	44
100	General	44
200	General Requirements	44
300	Packaging	45
400	Shipping	51
500	Receiving	52
600	Storage	53
700	Handling	55
800	Records	55
Subpart 2.3	Quality Assurance Requirements for Housekeeping at Nuclear Facilities	56
100	General	56
200	General Requirements	56
300	Requirements	57
400	Records	58
Subpart 2.5	Quality Assurance Requirements for Installation, Inspection, and Testing of Structural Concrete, Structural Steel, Soils, and Foundations for Nuclear Facilities	59
100	General	59
200	General Requirements	60
300	Requirements	60
400	Preconstruction Verification	60
500	Inspection of Soils and Earthwork	61
600	Inspection of Foundation Pile and Caisson Construction	62
700	Inspection of Concrete Construction	64
800	Inspection of Steel Construction	67
900	Data Analysis and Evaluation	68
1000	Records	69
Subpart 2.7	Quality Assurance Requirements for Computer Software for Nuclear Facility Applications	70
100	General	70
200	General Requirements	71
300	Software Acquisition	73
400	Software Engineering Method	73
500	Standards, Conventions, and Other Work Practices	75
600	Support Software	76

700	Reference	76
Subpart 2.8	Quality Assurance Requirements for Installation, Inspection, and Testing of Mechanical Items for Nuclear Facilities	77
100	General	77
200	General Requirements	77
300	Preinstallation Verification	78
400	Installation Inspections	79
500	Systems Turnover Inspection and Tests	80
600	Data Analysis and Evaluation	82
700	Records	82
Subpart 2.14	Quality Assurance Requirements for Commercial Grade Items and Services	83
100	General	83
200	CGI Definition Applications	84
300	Utilization	84
400	Technical Evaluation	84
500	Critical Characteristics	85
600	Methods of Accepting Commercial Grade Items and Services	85
700	Commercial Grade Services	88
800	Documentation	88
900	References	88
Subpart 2.15	Quality Assurance Requirements for Hoisting, Rigging, and Transporting of Items for Nuclear Power Plants	90
Subpart 2.17	Quality Assurance Requirements for Electronic Quality Assurance Records Systems	91
100	General	91
200	General Requirements	91
300	Record Recovery	91
400	Access Control and Retrieval	92
500	Digital and Physical Security	92
600	Electronic Data Integrity	92
700	Disposal of Records	92
800	Acquisition, Development, and Maintenance of Electronic Records Systems	92
Subpart 2.18	Quality Assurance Requirements for Maintenance of Nuclear Facilities	93
100	General	93
200	General Requirements	93
300	Preventive Maintenance	94
400	Corrective Maintenance	95
500	Records	95
Subpart 2.19	Quality Assurance Requirements for the Use of Supplier Accreditation for Calibration or Testing Services	96
100	General	96
200	Requirements	96
Subpart 2.20	Quality Assurance Requirements for Subsurface Investigations for Nuclear Facilities	98

100	General	98
200	General Requirements	98
300	Verification	99
400	Field Investigation	100
500	Laboratory Testing	102
600	Engineering Evaluation and Analysis	103
700	Records	103
Subpart 2.22	Quality Assurance Requirements for Management Assessment and Quality Improvement for Compliance With 10 CFR 830 and Department of Energy (DOE) Order 414.1 for DOE Nuclear Facilities	104
100	General	104
200	Management Assessment Requirements	105
300	Quality Improvement	106
400	Records	107
500	References	107
Subpart 2.25	Quality Assurance Requirements for High-Level Waste Custodians	108
100	General	108
200	Requirements	108
Part III	Guidance for Implementing Parts I and II Requirements	113
100	Introduction	113
200	Purpose	113
	Applicability	113
Subpart 3.1	Guidance for Implementing Part I Requirements	114
Subpart 3.1-1.1	Implementing Guidance for Part I, Requirement 1: Organization	115
100	General	115
200	Organizational Structure	115
300	Basic Principles	115
Subpart 3.1-2.1	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs	116
100	General	116
200	Program Format	116
300	Program Development	116
400	Work Requirements and Performance	117
500	Work Processes	117
600	Training and Qualification	118
700	Assessment of Performance	118
Subpart 3.1-2.2	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs, Lead Auditor Qualification	119
100	General	119
200	Education and Experience	119
300	Records	119
Subpart 3.1-2.3	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs, Inspection, and Test Personnel Qualification	122
100	General	122
200	Functional Qualifications	122

300	Education and Experience Qualifications	122
400	Use of Inspection and Test Personnel	123
Subpart 3.1-2.4	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs, Management Assessment of the QA Program	124
100	General	124
200	Types of Management Assessment	124
300	Scheduling and Planning	124
400	Assessment Performance	125
500	Reporting	126
Subpart 3.1-2.5	Risk-Informed Approach for the Treatment of Structures, Systems, and Components for Nuclear Facilities Not Subject to NRC Regulation	127
100	General	127
200	SSC Categorization	128
300	Adaptation	128
400	Implementation Guidance	129
500	Computer Software	132
600	Feedback and Progress Adjustment	132
700	10 CFR 50.69 Implementation References From EPRI	132
Subpart 3.1-3.1	Implementing Guidance for Part I, Requirement 3: Design Control	133
100	General	133
200	Design Input	133
300	Design Process	134
400	Design Analysis	135
500	Design Verification	136
600	Change Control	136
700	Use of Reverse-Engineering Techniques	137
800	Interface Control	138
900	Documentation and Records	138
1000	Additional Guidance and Recommended Reading	138
Subpart 3.1-4.1	Implementing Guidance for Part I, Requirement 4: Procurement Document Control	139
100	General	139
200	Procurement Document Review	139
300	Typical Scope of Procurement Effort	139
400	Categorization of Procurement Actions	140
500	General Logic Considerations	140
600	Logic Chart	141
700	Methods of Specifying Quality Assurance Program Requirements	141
Subpart 3.1-7.1	Implementing Guidance for Part I, Requirement 7: Control of Purchased Items and Services	144
100	General	144
200	Procurement Planning	144
300	Supplier Selection	144
400	Bid Evaluation	145

500	Purchaser/Supplier Communications	145
600	Control of Changes in Items or Services	145
700	Product Acceptance	145
Subpart 3.1-10.1	Implementing Guidance for Part I, Requirement 10: Inspection .	147
100	General	147
200	Inspection and Process Monitoring	147
300	In-Service Inspection	147
Subpart 3.1-15.1	Implementing Guidance for Part I, Requirement 15: Control of Nonconforming Items .	148
100	General	148
200	Identification	148
300	Segregation	148
400	Disposition	148
Subpart 3.1-16.1	Implementing Guidance for Part I, Requirement 16: Corrective Action .	151
100	General	151
200	Corrective Action	151
300	Basic Corrective Action Elements	151
400	Management Involvement	154
500	Process Chart	154
Subpart 3.1-16.2	Implementing Guidance for Part I, Requirement 16: Trend Analysis	155
100	General	155
200	Definitions	155
300	Trending Program	155
400	Data Collection	156
500	Trend Analysis Process	156
600	Trend Reporting	157
700	Records	158
800	References and Recommended Reading	158
Subpart 3.1-17.1	Implementing Guidance for Part I, Requirement 17: Quality Assurance Records .	159
100	General	159
200	List of Typical Lifetime Records	160
Subpart 3.1-17.2	Implementing Guidance for Part I, Requirement 17: Quality Assurance Records, Electronic Records .	163
100	General	163
200	Authentication of Records	163
300	Generation of Records	164
400	Receipt Control of Records	164
500	Storage	165
600	Access Control and Retrieval	165
700	Disposal of Records	166
800	Maintenance of Records System	167
900	System Integrity and Record Recovery	167
Subpart 3.1-18.1	Implementing Guidance for Part I, Requirement 18: Audits .	168
100	General	168

200	Definitions	168
300	Audit Administration	168
400	Preparation for Auditing	169
500	Audit Performance	171
600	Reporting	172
700	Response	172
800	Follow-Up Action	172
Subpart 3.1-18.2	Implementing Guidance on Classification and Handling Audit Issues	173
100	General	173
200	Introduction	173
300	Classification of Issues	173
400	Responses to Issues	174
500	Follow-Up	174
Subpart 3.1-18.3	Implementing Guidance for Part I, Requirement 18: Audits, Use of Surveillance	175
100	General	175
200	Planning and Scheduling	175
300	Preparation	175
400	Performance	176
500	Reporting and Communication	177
600	Resolution of Issues	177
Subpart 3.2	Guidance for Implementing Part II Requirements	178
Subpart 3.2-2.1	Implementing Guidance for Part II, Requirement 2.1: Cleaning of Fluid Systems	179
Subpart 3.2-2.7.1	Implementing Guidance for Part II, Requirement 2.7: Quality Assurance Requirements for Computer Software for Nuclear Facility Applications	180
100	General	180
200	General Requirements	182
300	Software Acquisition	183
400	Software Engineering Method	184
500	Standards, Conventions, and Other Work Practices	189
600	Support Software	189
700	References	189
Subpart 3.2-2.7.2	Implementing Guidance on the Requirements of ASME NQA-1, Parts I and II for Software Used for Nuclear Facility Applications	190
100	General	190
200	Flowchart Approach	190
Subpart 3.2-2.14	Implementing Guidance for Part II, Requirement 2.14: Quality Assurance Requirements for Commercial Grade Items and Services, Commercial Grade Computer Programs, and Software Services	212
100	General	212
200	Definition Applications	212
300	Utilization	213
400	Technical Evaluation	213
500	Critical Characteristics	214

600	Methods for Accepting Commercial Grade Items and Services	215
700	Commercial Grade Software Services	221
800	Documentation	221
900	References	222
Subpart 3.2-2.15	Implementing Guidance for Part II, Requirement 2.15: Hoisting, Rigging, and Transportation	223
100	General	223
Subpart 3.2-2.18.1	Implementing Guidance for Part II, Requirement 2.18: Maintenance of Nuclear Facilities, Establishing and Maintaining Equipment Histories	224
100	General	224
200	Developing an Equipment History	224
300	Maintaining Historical Data	224
400	Using Maintenance History	224
Subpart 3.2-2.18.2	Implementing Guidance for Part II, Requirement 2.18: Maintenance of Nuclear Facilities, Engineering Evaluations of Equipment Failures	225
100	Introduction	225
200	Engineering Evaluations	225
Subpart 3.2-2.20	Implementing Guidance for Part II, Requirement 2.20: Subsurface Investigations for Nuclear Facilities, Sample Control and Identification	227
100	General	227
200	Control of Subsurface Investigations	227
300	Identification of Samples	227
400	Control of Samples	227
Subpart 3.3	Nonmandatory Guidance on Quality Assurance Program Requirements for Collection of Scientific and Technical Information for Site Characterization of High-Level Nuclear Waste Repositories	228
Part IV	Guidance on the Application and Use of ASME NQA-1	229
100	Introduction	229
200	Purpose	229
	Applicability	229
Subpart 4.1	Guides on Use and Comparison of ASME NQA-1 With Other Quality Requirements	230
Subpart 4.1.1	Guidance to Modification of an ISO 9001:2015 Quality Management System for Compliance With ASME NQA-1, Part I	230
100	Purpose and Scope	230
200	Background	230
300	Terms and Definitions	230
400	Comparison Tables	230
Subpart 4.1.2	Guidance on the Use of ASME NQA-1-2008/1a-2009 for Compliance With Department of Energy Quality Assurance Requirements 10 CFR 830, Subpart A and DOE O 414.1	244
100	Purpose	244
200	Introduction	244
300	DOE Rule and Order General QAP Requirements	244

400	DOE Rule and Order QA Criteria	244
Subpart 4.1.3	Guidance on the Use of ASME NQA-1-2015 for Compliance With 10 CFR 71 or 10 CFR 72 Requirements	249
100	Purpose	249
200	Introduction	249
300	Summary Results	249
Subpart 4.1.4	Guidance to Modification of an IAEA GS-R-3 Quality Program to Meet ASME NQA-1a-2009 Requirements and Modification of an ASME NQA-1a-2009 Quality Program to Meet IAEA GS-R-3 Requirements	255
100	Purpose and Scope	255
200	Applicability	255
300	Background	255
400	How to Use This Guide to Achieve Compliance With IAEA GS-R-3 or ASME NQA-1	256
Subpart 4.1.5	Guidance to Modification of an ANSI/ANS-15.8-1995 (R2005; R2013) Quality Program to Meet ASME NQA-1-2012 Requirements	274
100	Introduction	274
200	Applicability	274
300	Background	274
400	Terms and Definitions	274
500	How to Use the Guide to Achieve Compliance With ASME NQA-1 or an ANSI/ANS-15.8 Quality Program	274
Subpart 4.1.6	Guidance to Modification of an ASME NQA-1-2019 Quality Program to Meet IAEA GSR Part 2 (2016) Management System Requirements	289
100	Purpose and Scope	289
200	Applicability	289
300	Background	289
400	How to Use This Guide to Achieve Compliance With ASME NQA-1	289
Subpart 4.2	Guides on Application of ASME NQA-1 to Work Processes and Activities	296
Subpart 4.2.1	Guidance on Graded Application of Nuclear Quality Assurance (NQA) Standard for Research and Development	296
100	Introduction	296
200	Research and Development Quality Assurance Through Peer Review	298
300	A Graded Approach	298
400	Quality Assurance Research and Development Applications	298
500	Research and Development Quality Assurance Glossary of Terms	299
600	Application of ASME NQA-1 to Research and Development Activities	299
700	Technology Life Cycle (Subpart 4.2.1) and Technology Readiness Levels	304
Subpart 4.2.3	Guidance on Qualification of Existing Data	306
100	General	306
200	Selecting Data Sets for Qualification	306
300	Data Qualification Process	306
400	Qualification Methods	306
500	Documentation of Results	307

Subpart 4.2.4	Guidance on the Control of Scientific Investigations	308
100	General	308
200	Planning and Performing Scientific Investigations	308
300	Technical Data	309
400	Sample Control	309
500	Peer Review	310
Subpart 4.2.5	Guidance on the Transition From Construction to Operation for Nuclear Facilities	311
100	General	311
200	Applicability	311
300	Transition Recommendations	311
400	Records	314
Subpart 4.2.6	Guidance on Quality Assurance for Decommissioning of Nuclear Facilities	315
100	General	315
200	Prerequisites	315
300	Predecommissioning Checks	316
400	Control During Decommissioning	318
500	Postdecommissioning Checks	319
600	Records	319
Subpart 4.2.7	Guidance on Peer Review	320
100	General	320
200	Terms and Definitions	320
300	Performance	320
400	Reviewer Selection	322
500	Comment Resolution	322
600	Peer Review Report	323
700	Records	323
Subpart 4.2.8	Guidance for Prevention, Detection, and Control of Counterfeit, Fraudulent, or Suspect Items (CFSI)	324
100	General	324
200	Prevention	325
300	Detection	325
400	Control	326
500	Records	327
600	References	327
Subpart 4.2.9	Guidance on Quality Assurance for Low-Level Waste Shipping From Nuclear Facilities	328
100	General	328
200	Prerequisites	333
300	Preshipping Checks	333
400	Procurement of Items and Services	335
500	Containers/Packaging	335
600	Equipment and Calibration	335
700	Disposition	335
800	Shipping Vehicle Inspection	336

900	Audits	336
1000	Post-Shipping Checks	336
1100	Records	336

FOREWORD

This Standard is intended to serve the global nuclear industry responsible for the safety and quality of nuclear facilities and activities.

It is intended to be applied to any structure, system, component, activity, or organization that is essential to the safe, reliable, and efficient performance of a nuclear facility and any activities independent of a facility that may affect performance. It is also intended to be applied to all phases of a nuclear facility life cycle and to related activities.

This Standard reflects industry experience and current understanding of the quality assurance requirements necessary to achieve safe, reliable, and efficient utilization of nuclear energy and management and processing of radioactive materials. The Committee on Nuclear Quality Assurance (NQA) actively endorses the growing worldwide movement toward rational, cost-effective quality assurance practices — practices that focus on results. The NQA Committee also maintains liaison with national and international groups that have similar interests in quality to assure consistency and maximum applicability of the Standard in a global setting. Consequently, the NQA Committee has regularly updated and revised the Standard since its first edition was issued in 1979 to improve its utility, effect on nuclear safety, and value to the nuclear industry.

This Standard includes requirements and guidance and is organized in the following four parts:

- (a) [Part I](#) contains requirements for a Quality Assurance Program for nuclear facility applications.
- (b) [Part II](#) contains additional quality assurance requirements for the planning and conduct of specific work activities conducted under a Quality Assurance Program developed in accordance with [Part I](#).
- (c) [Part III](#) contains guidance for implementing the requirements of [Parts I](#) and [II](#).
- (d) [Part IV](#) contains guidance for the application of ASME NQA-1 and comparisons of ASME NQA-1 with other quality requirements.

Early in 1975, the American National Standards Institute (ANSI) assigned overall responsibility for coordination among technical societies and development and maintenance of nuclear power quality assurance standards to the American Society of Mechanical Engineers (ASME). The ASME Committee on NQA was constituted on October 3, 1975, and assumed responsibility for the ANSI/ASME N45 series documents. Currently, the NQA Committee operates under the ASME requirements for Nuclear Codes and Standards Development Committees.

This Committee initially prepared

ANSI/ASME NQA-1-1979	Quality Assurance Program Requirements for Nuclear Power Plants
ANSI/ASME NQA-2-1983	Quality Assurance Requirements for Nuclear Power Plants
ANSI/ASME NQA-3-1989	Quality Assurance Requirements for High Level Waste Management

Requests for interpretation or suggestions for improvement of this Standard should be submitted in accordance with [Correspondence With the NQA Committee](#).

Following approval by the ASME NQA Committee and ASME, and after public review, ASME NQA-1-2024 was approved by ANSI as an American National Standard on June 13, 2024.

For a listing of the NQA publication history, refer to the following table:

Historical Listing of ASME NQA Publications

NQA-1			NQA-2			NQA-3		
Editions and Addenda	Designator	Issued	Editions and Addenda	Designator	Issued	Editions and Addenda	Designator	Issued

11th Ed.	NQA-1-2015	2/20/2015
12th Ed.	NQA-1-2017	1/18/2018
13th Ed.	NQA-1-2019	12/31/2019
14th Ed.	NQA-1-2022	6/30/2022
15th Ed.	NQA-1-2024	7/24/2024

GENERAL NOTE: NQA editions and addenda prior to 1989 were titled ANSI/ASME NQA.

NOTE: (1) This edition is a consolidation of ASME NQA-1 and ASME NQA-2.

ASME NQA COMMITTEE

Nuclear Quality Assurance

(The following is the roster of the committee at the time of approval of this Standard.)

STANDARDS COMMITTEE OFFICERS

T. S. Sandquist, *Chair*
R. Czuba, *Vice Chair*
C. Givens, *Vice Chair*
A. Dinizulu, *Secretary*

STANDARDS COMMITTEE PERSONNEL

J. G. Adkins, Consultant	C. H. Moseley, Jr., Edgewater Technical Associates
A. Appleton, Appleton Quality Concepts, LLC	M. F. Nicol, Navarro Research and Engineering
C. Beaman, U.S. Department of Energy Idaho Operations Office	E. Renaud, Westinghouse Electric Co., LLC
J. E. Bergstrom, Bergstrom Consulting	C. Roache, EnergySolutions
Z. Betsill, Southern Nuclear Operating Co.	R. A. Sacco, Shine Medical Technologies
R. L. Blyth, Consultant	T. S. Sandquist, Los Alamos National Laboratory
T. Bolt, Westinghouse Electric Co., LLC	L. Taggart, Taggart Quality Consultants, LLC
A. C. Cole, The Hartford Steam Boiler Inspection and Insurance Co.	M. H. Tannenbaum, Electric Power Research Institute, Inc.
M. Coren, Duke Energy	W. G. Ware, Consultant
M. K. Cox, BWXT Nuclear Operations Group, Inc.	J. R. Yanek, Executive Services NQA ESH
R. Czuba, Sonic Systems International, LLC	J. M. Ziembra, Atkinsrealis
S. Daw, Idaho National Laboratory	P. Ancion, <i>Contributing Member</i> , Westinghouse Belgium
A. Dinizulu, The American Society of Mechanical Engineers	M. Concepcion-Robles, <i>Contributing Member</i> , Constellation Energy
B. Frank, Westinghouse Electric Co.	K. A. Morrell, <i>Contributing Member</i> , SRNS
G. Galletti, U.S. Nuclear Regulatory Commission	T. Muraki, <i>Contributing Member</i> , Advanced Technology Transfer, Inc.
C. Givens, Bechtel National, Inc.	T. Rezk, <i>Contributing Member</i> , Bechtel Corp.
V. J. Grosso, Mission Support and Test Service (MSTS)	W. Sowder, Jr., <i>Contributing Member</i> , Quality Management Services, LLC
R. S. Jolly, Bechtel Power Corp.	R. A. Symes, <i>Contributing Member</i> , Consultant
C. R. Martin, Longnecker and Associates	D. Brown, <i>Honorary Member</i> , Sargent and Lundy, LLC
J. W. McIntyre, Sargent and Lundy, LLC	G. Danielson, <i>Honorary Member</i> , TechSource, Inc.
N. Moreau, Theseus Professional Services, LLC	T. E. Dunn, <i>Honorary Member</i> , Performance Development Corp.
K. L. Morris, Ellis and Watts Global Industries, Inc.	R. Schrotke, Jr., <i>Honorary Member</i> , Ron Schrotke, LLC

EXECUTIVE COMMITTEE ON NUCLEAR QUALITY

T. S. Sandquist, <i>Chair</i> , Los Alamos National Laboratory	B. Frank, Westinghouse Electric Co.
R. Czuba, <i>Vice Chair</i> , Sonic Systems International, LLC	G. Galletti, U.S. Nuclear Regulatory Commission
C. Givens, <i>Vice Chair</i> , Bechtel National, Inc.	R. S. Jolly, Bechtel Power Corp.
A. Dinizulu, <i>Secretary</i> , The American Society of Mechanical Engineers	J. W. McIntyre, Sargent and Lundy, LLC
C. Beaman, U.S. Department of Energy Idaho Operations Office	M. F. Nicol, Navarro Research and Engineering
J. E. Bergstrom, Bergstrom Consulting	E. Renaud, Westinghouse Electric Co., LLC
A. C. Cole, The Hartford Steam Boiler Inspection and Insurance Co.	L. Taggart, Taggart Quality Consultants, LLC
J. Ellis, U.S. Environmental Protection Agency	M. Tannenbaum, Electric Power Research Institute, Inc.

SUBCOMMITTEE ON ASSESSMENT AND VERIFICATION

- L. Taggart**, *Chair*, Taggart Quality Consultants, LLC
J. Ziembra, *Vice Chair*, Atkinsrealis
B. Blum, *Secretary*, Consultant
J. Atherton, Consultant
S. F. Borland, Hydroaire, Inc.
M. Concepcion, Constellation Energy
M. Coren, Duke Energy
M. Davis, U.S. Nuclear Regulatory Commission
J. Ellis, U.S. Environmental Protection Agency
E. D. Groover, Consultant
J. G. Ice, Terrapower, LLC
D. J. Jantosik, Sequoia Consulting Group, Inc.
R. M. Joschak, Framatome, Inc.
A. Keim, U.S. Nuclear Regulatory Commission
T. Kindelberger, Structural Technologies, LLC
J. W. McIntyre, Sargent and Lundy, LLC
- B. Mervak**, Mervak Applied Nuclear Consulting, LLC
K. Miller, Sargent and Lundy, LLC
K. L. Morris, Ellis and Watts Global Industries, Inc.
C. H. Moseley, Jr., Edgewater Technical Associates
J. A. Ortega-Luciano, U.S. Department of Energy
C. M. Palay, U.S. Department of Energy
M. D. Porter, Constellation Energy
G. C. Smolens, Department of Energy, National Nuclear Security Administration
R. A. Symes, Consultant
J. Verderber, Washington River Protection Solutions
T. S. Sandquist, *Contributing Member*, Los Alamos National Laboratory
W. Sowder, Jr., *Contributing Member*, Quality Management Services, LLC

SUBCOMMITTEE ON ENGINEERING AND PROCUREMENT PROCESSES

- R. S. Jolly**, *Chair*, Bechtel Power Corp.
T. Bolt, *Vice Chair*, Westinghouse Electric Co., LLC
T. N. Rezk, *Secretary*, Bechtel Power Corp.
K. Ash, Sargent and Lundy
N. Barker, Boston Government Services, LLC
C. Beaman, U.S. Department of Energy
Z. Betsill, Southern Nuclear Operating Co.
R. L. Boler, Consultant
E. Brown, U.S. Nuclear Regulatory Commission
D. Burget, Westinghouse
D. Burns, Zeno Power Systems
R. Czuba, Sonic Systems International, LLC
S. Daw, Idaho National Laboratory
M. Dittig, Boston Government Services, LLC
D. Ethington, GE Hitachi Nuclear Energy
S. T. Fairburn, BWX Technologies, Inc.
- V. J. Grosso**, Mission Support and Test Service (MSTS)
R. Horst, National Nuclear Security Administration
K. Kavanagh, U.S. Nuclear Regulatory Commission
P. Kilroy, U.S. Department of Energy
D. Newman, Framatome, Inc.
G. Oliveros, SGS
E. Renaud, Westinghouse Electric Co., LLC
T. S. Sandquist, Los Alamos National Laboratory
M. H. Tannenbaum, Electric Power Research Institute, Inc.
M. Vann Mitchell, Mitsubishi Nuclear Energy Systems
W. G. Ware, Consultant
N. Wright, InfoTech NorthStar, LLC
J. R. Yanek, Executive Services NQA ESH
P. J. Anderson, *Contributing Member*, Dominion Energy Services, Inc.
J. D. Lipsky, *Contributing Member*, Consultant
N. Sakamoto, *Contributing Member*, Mitsubishi Heavy Industries, Ltd.

SUBCOMMITTEE ON INTERFACE

- C. Givens**, *Chair*, Bechtel National, Inc.
T. Bolt, Westinghouse Electric Co., LLC
M. Concepcion-Robles, Constellation Energy
V. J. Grosso, Mission Support and Test Service (MSTS)
E. Renaud, Westinghouse Electric Co., LLC
- T. N. Rezk**, Bechtel Power Corp.
D. Riggs, Riggs Quality Consulting
C. R. Roache, EnergySolutions
M. H. Tannenbaum, Electric Power Research Institute, Inc.

SUBCOMMITTEE ON INTERNATIONAL ACTIVITIES

- M. H. Tannenbaum**, *Chair*, Electric Power Research Institute, Inc.
T. R. Verma, *Vice Chair*, Energy Engineering Co.
A. V. Chermak, *Secretary*, Battelle Energy Alliance, LLC
D. C. Agarwal, Inspection Expert, Inc.
P. Ancion, Westinghouse Belgium
B. Basu, Ranjan Consulting Engineers (OPC)
- P. Callens**, Vinçotte
S. F. K. Dzide, Nuclear Regulatory Authority, Ghana
C. Kofi Klutse, Ghana Atomic Energy Commission
A. Sengupta, U.S. Department of Transportation
M. Vann Mitchell, Mitsubishi Nuclear Energy Systems

SUBCOMMITTEE ON OPERATIONS

R. Czuba, *Chair*, Sonic Systems International, LLC
S. B. Ailes, Atkins Global — Member of the SNC-Lavalin Group
V. Ballew, Nuclear Waste Partnership, LLC
J. E. Bergstrom, Bergstrom Consulting
A. C. Cole, The Hartford Steam Boiler Inspection and Insurance Co.

M. Coren, Duke Energy
M. K. Cox, BWXT Nuclear Operations Group, Inc.
D. Ethington, GE Hitachi Nuclear Energy
J. M. Ziembra, Atkinsrealis

CHINA INTERNATIONAL WORKING GROUP

L. Haibin, *Chair*, Shanghai Nuclear Engineering Research and Design Institute Co., Ltd. (SNERDI)
D. Hongwei, *Vice Chair*, Nuclear and Radiation Safety Center
Y. Hua, *Secretary*, Shanghai Nuclear Engineering Research and Design Institute Co., Ltd. (SNERDI)
Z. Bo, Shengyang Blower Works Group Nuclear Pump Co., Ltd.
Z. Danping, Dongfang (Guangzhou) Heavy Machinery Co., Ltd.
J. Fei, China National Erzhong Group Co.
D. Hui, State Nuclear Baotai Zirconium Industry Co.

Y. Zhizhong, Shanghai Electric Nuclear Power Equipment Co., Ltd.

EUROPE INTERNATIONAL WORKING GROUP

P. Ancion, *Chair*, Westinghouse Belgium
P. Callens, *Secretary*, Vinçotte
D. Duba, TÜV Nord Systems GmbH and Co. KG
M. Horchler, KSB SE and Co. KGaA
J. Kickhofel, Apollo Plus
D. Koelbl, CIS GmbH, TÜV Thüringen Group

M. H. Koeppen, Framatome GmbH
H. Malkhasyan, Worleyparsons Nuclear Services
M. Psenicnik, Numip
A. Surarez Reales, Consultant
J. Wendt, TÜV Sud Industrie Service GmbH
C. Yilmaz, Schneider Electric/Gutor Electronic, LLC

INDIA INTERNATIONAL WORKING GROUP

B. Basu, *Chair*, Ranjan Consulting Engineers (OPC) Pvt., Ltd.
A. D. Bagdare, *Vice Chair*, Godrej Precision Engineering
V. Sehgal, *Vice Chair*, Larsen and Toubro, Ltd.
S. Subramanyam, *Secretary*, Larsen and Toubro, Ltd.
D. Kulkarni, Consultant

L. Manikandan, Aruna Alloy Steels Pvt., Ltd.
N. Mistry, The Hartford Steam Boiler Inspection and Insurance Co.
T. Mukherjee, Reliance Industries, Ltd.
R. Sahai, Nuclear Power Corp. of India, Ltd.

SUBCOMMITTEE ON PROGRAM MANAGEMENT PROCESS

J. E. Bergstrom, *Chair*, Bergstrom Consulting
M. K. Cox, *Vice Chair*, BWXT Nuclear Operations Group, Inc.
C. R. Roache, *Vice Chair*, EnergySolutions
R. Ruland, *Secretary*, Sandia National Labs
J. Adkins, Consultant
C. Allred, Bechtel National, Inc.
A. Appleton, Appleton Quality Concepts, LLC
A. R. Armstrong, U.S. Nuclear Regulatory Commission
R. L. Blyth, Consultant
T. D. Bradley, Savannah River Nuclear Solutions
W. Clover, Constellation Energy Generation
A. C. Cole, The Hartford Steam Boiler Inspection and Insurance Co.
J. N. Dailey, Weller Energy Services Corp.
S. Diffey, Los Alamos National Laboratory
R. Goff, Consultant

D. Gregory, Bechtel Power Corp.
J. Grimm, Dubose National Energy Services, Inc.
C. Kofi Klutse, Ghana Atomic Energy Commission
S. Laherty, Brookhaven National Laboratory
H. Malkhasyan, Worleyparsons Nuclear Services
L. E. Meche, Turner Industries Group, LLC
R. A. Sacco, Shine Medical Technologies
R. Seipel, Shine Medical Technologies
T. Shashaty, Dominion Energy, Inc.
A. St. John, Framatome
D. Vickery, Dubose National Energy Services, Inc.
H. S. O. Al Jaber, *Contributing Member*, ENEC
C. Castillo, *Contributing Member*, North Wind Portage
A. Charlton, *Contributing Member*, Savannah River Nuclear Solutions
L. A. Yochim, *Contributing Member*, Black & Veatch

SUBCOMMITTEE ON SOFTWARE QUALITY ASSURANCE

B. Frank, *Chair*, Westinghouse Electric Co.
D. Riggs, *Vice Chair*, Riggs Quality Consulting
A. R. Mrugacz, *Secretary*, Sargent and Lundy, LLC
L. Abbott, Savannah River Nuclear Solutions
S. B. Ailes, Atkins Global — Member of the SNC-Lavalin Group
W. Brown, Hanford Mission Integration Solutions (HMIS)
V. Camarillo-Morris, Los Alamos National Laboratory
Y. Deaton, U.S. Department of Energy
G. S. Galletti, U.S. Nuclear Regulatory Commission
C. Givens, Bechtel National, Inc.
T. J. Hall, Ellis & Watts Global Industries, Inc.
N. M. Kyle, Theseus Quality Assurance
G. A. Lipscomb, Goldwing Services, LLC
N. Moreau, Theseus Professional Services, LLC

S. Sekar, Ultra Safe Nuclear
H. V. Sobah, Retired
D. Taneja, U.S. Nuclear Regulatory Commission
G. Udenta, Consultant
T. R. Verma, Energy Engineering Co.
R. W. VonRoble, VonRoble Consulting
R. Ward, Consolidated Nuclear Security, LLC
M. Apodaca, *Contributing Member*, Sandia National Laboratories
C. R. Martin, *Contributing Member*, Longnecker and Associates
T. Muraki, *Contributing Member*, Advanced Technology Transfer, Inc.
P. L. Valdez, *Contributing Member*, Palo Verde Generating Station
D. Williams, *Contributing Member*, Consultant
D. Zhang, *Contributing Member*, U.S. Nuclear Regulatory Commission

SUBCOMMITTEE ON WASTE MANAGEMENT

M. F. Nicol, *Chair*, Navarro Research and Engineering
V. J. Grosso, *Vice Chair*, Mission Support and Test Service (MSTS)
J. Mosser, *Secretary*, U.S. Environmental Protection Agency
V. Ballew, Nuclear Waste Partnership, LLC
B. Bice, Seafab Metals
M. Cervantes, Idaho National Laboratory
M. L. Coriz, Los Alamos National Laboratory

M. Moore, Sandia National Laboratories
K. A. Morrell, SRNS/Aiken SC
A. Sengupta, U.S. Department of Transportation
C. R. H. Shearer, ISL, Inc.
J. Tapp, U.S. Nuclear Regulatory Commission
R. Wood, Trinity Engineering Associates, Inc.
P. Yadav, U.S. Nuclear Regulatory Commission

CORRESPONDENCE WITH THE NQA COMMITTEE

General. ASME codes and standards are developed and maintained by committees with the intent to represent the consensus of concerned interests. Users of ASME codes and standards may correspond with the committees to propose revisions or cases, report errata, or request interpretations. Correspondence for this Standard should be sent to the staff secretary noted on the committee's web page, accessible at <https://go.asme.org/NQACommittee>.

Revisions and Errata. The committee processes revisions to this Standard on a continuous basis to incorporate changes that appear necessary or desirable as demonstrated by the experience gained from the application of the Standard. Approved revisions will be published in the next edition of the Standard.

In addition, the committee may post errata on the committee web page. Errata become effective on the date posted. Users can register on the committee web page to receive e-mail notifications of posted errata.

This Standard is always open for comment, and the committee welcomes proposals for revisions. Such proposals should be as specific as possible, citing the paragraph number, the proposed wording, and a detailed description of the reasons for the proposal, including any pertinent background information and supporting documentation.

Cases. The committee does not issue cases for this Standard.

Interpretations. Upon request, the committee will issue an interpretation of any requirement of this Standard. An interpretation can be issued only in response to a request submitted through the online Inquiry Submittal Form at <https://go.asme.org/InterpretationRequest>. Upon submitting the form, the inquirer will receive an automatic e-mail confirming receipt.

ASME does not act as a consultant for specific engineering problems or for the general application or understanding of the Standard requirements. If, based on the information submitted, it is the opinion of the committee that the inquirer should seek assistance, the request will be returned with the recommendation that such assistance be obtained. Inquirers can track the status of their requests at <https://go.asme.org/Interpretations>.

ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME committee or subcommittee. ASME does not "approve," "certify," "rate," or "endorse" any item, construction, proprietary device, or activity.

Interpretations are published in the ASME Interpretations Database at <https://go.asme.org/Interpretations> as they are issued.

Committee Meetings. The NQA Standards Committee regularly holds meetings that are open to the public. Persons wishing to attend any meeting should contact the secretary of the committee. Information on future committee meetings can be found on the committee web page at <https://go.asme.org/NQACommittee>.

INTRODUCTION

This Standard is to be applied to any structure, system, component, activity, or organization that is essential to the safe, reliable, and efficient performance of a nuclear facility and any activities independent of a facility that may affect performance (e.g., transportation of nuclear materials) of those activities. The extent to which this Standard should be applied depends upon the specific type of facility, items, or services involved and the nature, scope, and relative importance of the activity being performed. It is also to be applied to all phases of a nuclear facility life cycle (e.g., siting, design, construction, operation, and decommissioning) and all types of activities (e.g., training, testing, software development or use).

The Standard also applies to activities that could affect the quality of nuclear material applications, structures, systems, and components of nuclear facilities.

Examples of nuclear facilities are those for power generation, spent fuel storage, waste management, fuel reprocessing, nuclear material processing, fuel fabrication, nuclear research, and other related facilities. Examples of activities include siting, designing, procuring, developing or using software, fabricating, constructing, handling, shipping, receiving, storing, cleaning, erecting, installing, inspecting, testing, operating, maintaining, repairing, refueling, modifying, and decommissioning.

This Standard is organized in the following four parts:

(a) [Part I](#) contains requirements for developing and implementing a Quality Assurance Program for nuclear facility applications.

(b) [Part II](#) contains additional quality assurance requirements for the planning and conduct of specific work activities under a Quality Assurance Program developed in accordance with [Part I](#).

(c) [Part III](#) contains guidance for implementing the requirements of [Parts I](#) and [II](#).

(d) [Part IV](#) contains guidance for application of ASME NQA-1 and comparisons of NQA-1 with other quality requirements.

The arrangement of the requirements in [Parts I](#) and [II](#) and the guidance in [Parts III](#) and [IV](#) permit the judicious application of the Standard or portions of the Standard. Applicable requirements of [Parts I](#) and [II](#) are to be implemented to ensure conformance with ASME NQA-1. The application of this Standard, or portions thereof, shall be invoked by written contracts, policies, procedures, specifications, or other appropriate documents.

This Standard reflects industry experience and current understanding of the quality assurance requirements necessary to achieve safe, reliable, and efficient utilization of nuclear energy and management and processing of radioactive materials. The Standard focuses on the achievement of results, emphasizes the role of the individual and line management in the achievement and sustainment of quality, and fosters the application of these requirements in a manner consistent with the relative importance of the item or activity (i.e., a "graded approach").

ASME NQA-1-2024

SUMMARY OF CHANGES

Following approval by the ASME NQA Standards Committee and ASME, and after public review, ASME NQA-1-2024 was approved by the American National Standards Institute on June 13, 2024.

ASME NQA-1-2024 includes the following changes identified by a margin note, (24).

<i>Page</i>	<i>Location</i>	<i>Change</i>
1	Part I, 400	(1) Definitions of <i>assure</i> and <i>ensure</i> added (2) Footnote (1) added, and subsequent footnotes renumbered
5	Part I, Requirement 1, 201	Subparagraph (d) revised
6	Part I, Requirement 2, 300	Revised
6	Part I, Requirement 2, 301	Revised
7	Part I, Requirement 2, 303.5	Subparagraph (c) revised
8	Part I, Requirement 2, 400	Revised in its entirety
12	Part I, Requirement 4, 100	Revised
12	Part I, Requirement 4, 200	Terms “Purchaser” and “Supplier” lowercased throughout
12	Part I, Requirement 4, 300	The term “Supplier” lowercased throughout
13	Part I, Requirement 5, 100	First sentence revised
18	Part I, Requirement 8, 100	Revised
18	Part I, Requirement 8, 200	Paragraphs 201 and 202 revised
19	Part I, Requirement 9, 100	Revised
19	Part I, Requirement 9, 200	Paragraphs 201 and 203 revised
19	Part I, Requirement 9, 300	Former para. 300 deleted, and former para. 400 revised and redesignated
20	Part I, Requirement 10, 500	Revised
20	Part I, Requirement 10, 700	Revised
20	Part I, Requirement 10, 800	Subparagraph (f) revised
22	Part I, Requirement 11, 100	Last sentence added
22	Part I, Requirement 11, 200	Subparagraph (a) revised
22	Part I, Requirement 11, 300	Title revised
22	Part I, Requirement 11, 400	Former section 400 deleted, and subsequent paragraphs redesignated
22	Part I, Requirement 11, 500	(1) Former para. 600 revised in its entirety (2) Former paras. 601 and 602 deleted
25	Part I, Requirement 13, 500	Revised
31	Part I, Requirement 18, 200	Second paragraph revised
31	Part I, Requirement 18, 201	Revised
31	Part I, Requirement 18, 301	Last sentence added
32	Part I, Requirement 18, 500	Subparagraph (c) revised
35	Part II, Subpart 2.1	Title revised
35	Part II, Subpart 2.1, 100	Revised

<i>Page</i>	<i>Location</i>	<i>Change</i>
35	Part II, Subpart 2.1, 101	In definition of <i>sensitized corrosion-resistant alloy</i> , ASTM specification updated
36	Part II, Subpart 2.1, 201	First paragraph revised
37	Part II, Subpart 2.1, 203	Second paragraph revised
37	Part II, Subpart 2.1, 204	Last sentence added
37	Part II, Subpart 2.1, 302.1	ASTM specifications updated
37	Part II, Subpart 2.1, 302.2	ASTM specifications updated throughout
38	Part II, Subpart 2.1, 302.4	(1) In subpara. (d), ASTM specification updated (2) Note revised
39	Part II, Subpart 2.1, Table 302.5	(1) Under "Rust," entries for Classes B and C revised (2) Under "Flushing Criteria," last entry corrected by errata (3) Note (3) added
40	Part II, Subpart 2.1, 400	First three paragraphs revised
44	Part II, Subpart 2.2, 201	Revised
47	Part II, Subpart 2.2, 304.1	Subparagraph (c) revised
48	Part II, Subpart 2.2, 306.3	Subparagraph (j) revised
50	Part II, Subpart 2.2, 309	Subparagraph (b)(3) revised
51	Part II, Subpart 2.2, 405	Revised
52	Part II, Subpart 2.2, 502.2	Subparagraph (b) revised
53	Part II, Subpart 2.2, 504	Revised
61	Part II, Subpart 2.5, 504	Subparagraph (f) revised
66	Part II, Subpart 2.5, 711	First paragraph revised
67	Part II, Subpart 2.5, 712	Revised
67	Part II, Subpart 2.5, 804	Fourth paragraph revised
68	Part II, Subpart 2.5, 804.1	Last paragraph revised
69	Part II, Subpart 2.5, 903	Revised
70	Part II, Subpart 2.7, 101	(1) Former paras. 101 and 102 transposed and cross-references updated throughout (2) Definition of <i>source code</i> added
72	Part II, Subpart 2.7, 203.1	Subparagraph (b)(3) added, and subsequent subparagraph redesignated
73	Part II, Subpart 2.7, 401	Revised
76	Part II, Subpart 2.7, 601	Second paragraph revised
76	Part II, Subpart 2.7, 700	Updated
88	Part II, Subpart 2.14, 900	Updated
96	Part II, Subpart 2.19, 201	(1) Subparagraph (a) revised (2) Subparagraphs (a)(3) and (b)(2) added, and subsequent subparagraphs redesigned
96	Part II, Subpart 2.19, 202	(1) Subparagraphs (a) and (a)(2) revised (2) Subparagraphs (a)(3) and (b)(2) added, and subsequent subparagraphs redesigned
99	Part II, Subpart 2.20, 300	Paragraphs 302 through 305 revised
107	Part II, Subpart 2.22, 500	Updated
119	Part III, Subpart 3.1-2.2, 100	Revised
120	Part III, Subpart 3.1-2.2, Figure 300	

<i>Page</i>	<i>Location</i>	<i>Change</i>
122	Part III, Subpart 3.1-2.3, 100	Data in "Experience" and "Other Credentials of Professional Competence" boxes revised
122	Part III, Subpart 3.1-2.3, 300	Revised
123	Part III, Subpart 3.1-2.3, 400	Revised in its entirety
124	Part III, Subpart 3.1-2.4, 100	Subparagraph (a) revised
124	Part III, Subpart 3.1-2.4, 201	First paragraph revised
124	Part III, Subpart 3.1-2.4, 202	Revised
124	Part III, Subpart 3.1-2.4, 301	Titles of subparas. (a) through (c) revised
125	Part III, Subpart 3.1-2.4, 302	Last paragraph revised
125	Part III, Subpart 3.1-2.4, 401	Second and third paragraphs and subparas. (d) and (g) revised
126	Part III, Subpart 3.1-2.4, 402	First sentence and subparas. (f) and (g) revised
127	Part III, Subpart 3.1-2.5, 101	First sentence and subparas. (b) and (c) revised
130	Part III, Subpart 3.1-2.5, 403.2	Definitions of <i>HSS</i> and <i>LSS</i> revised
132	Part III, Subpart 3.1-2.5, 602	Second paragraph revised
132	Part III, Subpart 3.1-2.5, 700	Revised
134	Part III, Subpart 3.1-3.1, 300	Updated
136	Part III, Subpart 3.1-3.1, 401.2	Revised
136	Part III, Subpart 3.1-3.1, 401.3	Title revised
137	Part III, Subpart 3.1-3.1, 700	First sentence revised
138	Part III, Subpart 3.1-3.1, 1000	(1) Title revised (2) Updated
139	Part III, Subpart 3.1-4.1, 301	First paragraph and subparas. (c) and (h) revised
139	Part III, Subpart 3.1-4.1, 302	Subparagraph (d) revised
140	Part III, Subpart 3.1-4.1, 400	First sentence revised
144	Part III, Subpart 3.1-7.1, 100	Revised
145	Part III, Subpart 3.1-7.1, 700	Revised
145	Part III, Subpart 3.1-7.1, 701	Paragraph and subparagraph designations revised in their entirety
146	Part III, Subpart 3.1-7.1, 704	First sentence revised
158	Part III, Subpart 3.1-16.2, 800	Updated
168	Part III, Subpart 3.1-18.1, 200	Added, and subsequent paragraphs redesignated
168	Part III, Subpart 3.1-18.1, 303	In former para. 203, first paragraph revised
169	Part III, Subpart 3.1-18.1, 305	Former subpara. 205(e) revised
170	Part III, Subpart 3.1-18.1, 402.1	Former para. 302.1 revised
170	Part III, Subpart 3.1-18.1, 402.2	In former para. 302.2, first paragraph revised
170	Part III, Subpart 3.1-18.1, 402.5	In former para. 302.5, second paragraph revised
170	Part III, Subpart 3.1-18.1, 402.6	Former para. 302.6 revised
171	Part III, Subpart 3.1-18.1, 403	Former para. 303 revised
171	Part III, Subpart 3.1-18.1, 503.1	Former para. 403.1 revised
171	Part III, Subpart 3.1-18.1, 503.3	Added
172	Part III, Subpart 3.1-18.1, 504	Former para. 404 revised
172	Part III, Subpart 3.1-18.1, 600	Former para. 500 revised
172	Part III, Subpart 3.1-18.1, 800	In former para. 700, first paragraph revised, and subparas. (c) and (d) revised

PART I

REQUIREMENTS FOR QUALITY ASSURANCE PROGRAMS FOR NUCLEAR FACILITIES (FROM FORMER NQA-1)

INTRODUCTION

This Standard reflects industry experience and current understanding of the quality assurance requirements necessary to achieve safe, reliable, and efficient utilization of nuclear energy, and management and processing of radioactive materials. The Standard focuses on the achievement of results, emphasizes the role of the individual and line management in the achievement of quality, and fosters the application of these requirements in a manner consistent with the relative importance of the item or activity.

100 PURPOSE

Part I — this Part — establishes requirements for the development and implementation of a Quality Assurance Program (QAP) for nuclear facility applications. It is arranged by Requirements 1 through 18.

Part II contains additional quality assurance requirements for the planning and conduct of specific work activities under a Quality Assurance Program developed in accordance with **Part I**. It is arranged by Subparts.

Part III contains guidance for implementing the requirements of **Parts I** and **II**. It is arranged by Subparts.

Part IV contains guidance for the application of NQA-1 and comparisons of NQA-1 with other quality requirements. It is arranged by Subparts.

200 APPLICABILITY

Part I is applied using a graded approach to any structure, system, component, activity, or organization that is essential to the safe, reliable, and efficient performance of a nuclear facility and to any activities independent of a facility that may affect performance (e.g., transportation of nuclear materials) of those activities. It is also applied using a graded approach to all phases of a nuclear facility life cycle (e.g., siting, design, construction, operation, and decommissioning) and to all types of activities (e.g., training, testing, software development and use). A Quality Assurance Program developed in accordance

with **Part I** is applied when implementing **Part II** requirements.

300 RESPONSIBILITY

The user or implementing organization invoking this Standard shall determine and document applicable Part I Requirements and appropriately relate them to specific items, activities, and services. The organization implementing this Part and applicable **Part II** requirements as determined by scope of work, contract, legal, and regulatory requirements shall be responsible for complying with the specific requirements to achieve quality results in compliance with this Standard.

400 TERMS AND DEFINITIONS

(24)

The following definitions are provided to assure a uniform understanding of select terms as they are used in this Standard.

acceptance criteria: specified limits placed on the performance, results, or other characteristics of an item, process, or service defined in codes, standards, or other requirement documents.

assessment: an all-inclusive term that may include review, evaluation, inspection, test, check, surveillance, or audit to determine and document whether items, processes, systems, or services meet specified requirements and perform effectively.

*assure*¹: to promise or state with certainty by one person or organization to another person or organization; to remove the doubt of an outcome. Contrast with *ensure*. For example, “The tester assures the designer that all tests have passed.”

¹This definition has been adapted from IEEE Std 730-2014, IEEE Standard for Software Quality Assurance Processes, with the permission of IEEE.
